

## Tri-NIT Hackathon: General Rules

- The number of members per team can be from a minimum of 1 to a maximum of 3.
- The hackathon is open to all **undergraduate Indian college students**.
- Requirements: Valid ID Proof, laptops, chargers, and other hardware equipment required to complete your solution (No reimbursement will be provided for the same).
- **Plagiarism** in any form in the submitted solution will lead to **direct disqualification**.
- Organizers will **not** be providing any reimbursement for the use of any sort of paid APIs (if any) as a part of your solution.
- The **criteria for judging** are as follows: Originality of the idea, design, functionality, and implementation of the idea in a real-time scenario. Judging is based on the **software/simulation only** and a PDF explaining the solution to the problem statements.
- No development may start before the actual date and time of the event. Any team that violates this rule will be automatically disqualified. The first line of code should be written on or after **29th January 2022, 2:00 PM** after the problem statements have been released.
- A team can submit only one entry for the hackathon. Participation at the hackathon is subject to a “per-team” basis meaning you are not allowed to be on more than one team at the event.

## Submission Guidelines:

- The final submission should be a **GitHub repository link**:
  - Repository name : *TRINIT\_<TeamName>\_<PSCode>*
  - Include whole code inside this repository only. (*For electronics track, refer to the submission guidelines mentioned separately for electronics problem statements*).
  - Add readme file for any drive links for demo/short explanation of your solution.
  - **Don't forget to make your repository "Public" after 1:55 PM on 30th January.**
  - **Give access to everyone (viewable by all) for any drive link included. If we are not able to access your drive link or your codes, your team will be automatically disqualified.**
- All projects should be submitted in the **Dare2Compete** platform before judging begins on **January 30 at 2:00 PM**. Failure to submit will result in disqualification. The team should commit regularly throughout the hackathon to the team repository.
- **There must not be any commit on the repository after 2:00 PM, January 30th.**
